

- Outcomes
 - equally likely, 136
 - possible, 137–139
- Outdoor darkness problem, 171
- Outliers, 44, 48, 80, 120–121, 522, 523
 - assessing normality with, 297
- P
- Paired data, 496, 497, 498
- Palmistry, 500
- Parameter(s), 16
 - of probability distribution, 200–202
 - selecting appropriate, 722
- Parametric tests, 636, 637
- Pareto chart, 64–65
- Passwords, 177
- Payoff odds, 143
- p chart, 702–707
- Pearson product moment correlation coefficient, 497
- Peer review, 716–717, 718
- Penny weight problem, 49–50, 62
- Per capita income problem, 86
- Percentage (relative) frequency distribution, 47–48
- Percentages
 - decimal conversion, 11
 - misleading, 10–11
 - principles, 10–11
 - proportion conversion, 324–325
- Percentiles, 114–117
 - converting to a data value, 115–117
 - definition, 114
 - finding, 115
- Permutations rule, 175–180
- Personal security code study, 177
- Perspectives, 721–722
- Pharmaceutical companies, conflicts of
 - interest in, 717, 718
- Pictograph, 68–69
- Pie chart, 65
- Placebo effect, 26, 29
- Point estimate, 324, 325, 335, 343, 350, 361
- Poisson distribution, 228–235
 - as approximation to binomial distribution, 231
 - definition, 229
 - formula, 229
 - parameters of, 229, 231
 - requirements for, 229
- Polio study, 446
- Polls. *See* Surveys
- Polygon, frequency, 65–67
- Polygraph problem, 401
- Pooled estimate of σ^2 , 460–461
- Pooled sample proportion, 443
- Pooled sample variances, 461–462
- Pooled testing, 176
- Population
 - changing, 44
 - definition, 4, 5
 - finite, 292
 - size, 333, 334
 - standard deviation, 101
 - variance, 101–102, 276
- Population mean. *See* Mean
- Population model, 551–552
- Population proportion. *See* Proportion
- Population size problem, 551–552
- Population standard deviation. *See* Standard deviation
- Population variance. *See* Variance(s)
- Positively skewed, 56–57
- Positive predictive value, 133
- Power of a hypothesis test, 394–396
- Practical significance, 9
- Precise numbers, 10
- Prediction, regression equation, 520–522
- Prediction intervals, 532–539
- Prediction software, 517
- Predictor (independent) variable, 517, 540, 545
- Presidential chronology problem, 177
- Prevalence, 133
- Primary sampling units, 26
- Prisoner experimentation study, 714
- Prisoner studies, 714
- Probabilistic models, 517
- Probability, 132–193
 - addition rule, 149–152, 163
 - area and, 246, 247
 - basic concepts of, 135–149
 - classical approach, 136, 137–138
 - combinations rule, 175–180
 - complementary events, 140–141, 152
 - complements, 168–169
 - conditional, 168, 169–171
 - counting, 175–184
 - factorial rule, 177
 - intuitive approach, 170–171
 - law of large numbers, 137
 - “at least one,” 168–169
 - legal application, 169, 171, 199
 - multiplication rule, 156–175
